Election/Restrictions

DETAILED ACTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4 drawn to a microbial method of making carotenoids wherein production ratios are made constant by controlling concentration of dissolved oxygen in the culture composition comprising propionic bacteria.

Group II, claim(s) 5-11 drawn to a microbial method of making carotenoids wherein production ratios are changed by controlling concentration of dissolved oxygen in the culture composition comprising propionic bacteria.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

First, the inventions of groups I-II do not match a permitted category as PCT Rule 13.2 does not provide for multiple methods or products in one category. Two distinct processes are claimed having distinct steps. In group I the ratio of carotenoids to be produced is made constant by controlling oxygen, while in group II the ratios of carotenoids produced is changed by controlling oxygen, which are opposite and distinct effects.

No common inventive concept is shared among groups I through II, since a technical relationship is lacking among the claimed inventions involving one or more special technical features because process of making cultures of propionic acid bacteria as well as the claimed methods of use and compositions are known in the art. See, e.g., Yamane *et al.* who demonstrate that carotenoid ratio can be maintained by controlling oxygen at page 4474.

The requirement of unity of invention is not fulfilled because there is no technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" means those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes

over the prior art. Therefore, a technical relationship is lacking among the claimed inventions involving one or more special technical features.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irene Marx whose telephone number is (703) 308-2922. The examiner can normally be reached on Monday through Friday from 6:30 AM to 3:00 PM.
